

16.th ESPEN Course in Clinical Nutrition

Fruska Gora, Norcevo – Serbia, October 8th – 14th, 2009.

Aims

To provide clinically relevant information about Clinical Nutrition.

To enable participants to start a Clinical Nutrition programme back in their workplace, and to introduce the LLL programme.

Who should attend

Young (up to 35 years) European physicians from different specialities who have interest in Clinical Nutrition (approximately 60 participants).

Learning objectives

The course will be held as plenary lectures, LLL courses and group working practical demonstrations, as well as case – based problem – solving discussions; each clinical case will be plenary debated during the next morning by the students together with the tutors.

Main areas to be covered are: nutritional assessment, prevention and treatment of malnutrition, techniques, control and complications of nutritional support, nutrition in different diseases: critically ill, sepsis, single and multiple organ failure, gastrointestinal disorders, cardiac, lung and kidney failure and many other clinical practice topics.
